CS 346: Meeting Minutes

Date: _____10.12_____   Team: 211

Present: Everyone

Absent:

Agenda

- Meeting online to discuss some potential issues that we meet during development.
- Shared the progress we had done so far.

Notes

- The first potential issue merging different branch together with all conflict solved.

- Somehow when we updated or pulled from main branch to our branch, there are some unexpected behaviors such as file loss and conflicts.

- There are some suggested improvements to the each page. Add a files list system in the note page; Rearrange the layout to make it looks good.

Decisions

- Made a detail instruction for git process. For each time we want to update and merge our change to the flow, we need to follow this instruction.

- Decided the final layout and application style for Demo 1.

Actions

- Learning to use components in Material3, trying to recompose and apply them to help us better implement our application layout.
- Work individually on each member's branch to develop their target page.
- Consider how we can attractive a well-designed and usable interface as we want to use this app in the future.
